Features

1. The machine can equip with the ratio-mixer (for new and old materials) for mixing materials evenly, together with the material sucking machine (vacuum autoloader) to achieve the immediate recycling.
2. The removable rotating cutter specially designed with claw-blade configuration has high cutting force.
3. With double-ply sound insulation to lower the noise.
4. Low horsepower, low rotation speed, high torque, energy saving, and heighten the quality precision, and efficiency.
5. Compact size, multi-purpose, and movable. The material load intake is adjustable.
